Editorials
1635 Thank you and goodbye!
T K Kiven

1636 The new editor greets you
J S Smolen

Recommendation
1637 European evidence-based recommendations for diagnosis and treatment of paediatric antiphospholipid syndrome: the SHARE initiative

Clinical and epidemiological research
1642 Acute coronary syndrome in new-onset rheumatoid arthritis: a population-based nationwide cohort study of time trends in risks and excess risks
M Holmqvist, L Ljung, J Askling

1648 ADEA2 deficiency (ADDA2) as an unrecognised cause of early onset polyarteritis nodosa and stroke: a multicentre national study

1657 Knee extensor strength and body weight in adolescent men and the risk of knee osteoarthritis by middle age
A Turkiewicz, S Timpka, J B Thorlund, E Ageberg, M England

1662 Randomised controlled trial of prolonged treatment in the remission phase of ANCA-associated vasculitis
A Karras, C Pagouze, M Hausitz, K de Groot, X Puech, J W Cohen Tervaert, M Segelmark, L Guillen, D Jayne, On behalf of the European Vasculitis Society

1669 Comparative effectiveness of allopurinol versus febuxostat for preventing incident renal disease in older adults: an analysis of Medicare claims data
J A Singh, J D Cleveland

1679 Efficacy and safety of the biosimilar ABP 501 compared with adalimumab in patients with moderate to severe rheumatoid arthritis: a randomised, double-blind, phase III equivalence study

1688 The dynamics of response as measured by multiple composite outcome tools in the Tight Control of inflammation in early Psoriatic Arthritis (TICOPA) trial
L C Coates, F Markwood, P Emery, P G Conaghan, P S Hellwell

1693 Low disease activity (DAS28<3.2) reduces the risk of first cardiovascular event in rheumatoid arthritis: a time-dependent Cox regression analysis in a large cohort study
E E A Arts, J Fransen, A A Den Broeder, P L C M van Riel, C D Popp

1700 A population-based cohort study of rheumatoid arthritis-associated interstitial lung disease: comorbidity and mortality
C Hyldgaard, O Hilberg, A B Pedersen, S P Ulrichsen, L Lakke, B Bendstrup, T Ellingsen

1707 Magnetic resonance imaging assessed inflammation in the wrist is associated with patient-reported physical impairment, global assessment of disease activity and pain in early rheumatoid arthritis: longitudinal results from two randomised controlled trials

MORE CONTENTS ▶
Long-term outcomes after disease activity-guided dose reduction of TNF inhibition in rheumatoid arthritis: 3-year data of the DRESS study - a randomised controlled pragmatic non-inferiority strategy trial

Pattern of risks of systemic lupus erythematosus among statin users: a population-based cohort study

The yield of a positive MRI of the spine as imaging criterion in the ASAS classification criteria for axial spondyloarthritides: results from the SPACE and DESIR cohorts

Survival benefit of statin use in ankylosing spondylitis: a general population-based cohort study

Obesity and rates of clinical remission and low MRI inflammation in rheumatoid arthritis

Rheumatoid arthritis and polymyalgia rheumatica occurring after immune checkpoint inhibitor treatment

Differences in the symptomatic phase preceding ACPA-positive and ACPA-negative RA: a longitudinal study in arthralgia during progression to clinical arthritis

Basic and translational research

H1N1 vaccination in Sjögren’s syndrome

Microarray analysis of bone marrow lesions in osteoarthritis demonstrates upregulation of genes implicated in osteochondral turnover, neurogenesis and inflammation

Cross-phenotype association mapping of the MHC identifies genetic variants that differentiate psoriatic arthritis from psoriasis

Germinai centres in diagnostic labial gland biopsies of patients with primary Sjögren’s syndrome are not predictive for parotid MALT lymphoma development

Erratum: How common is clinically inactive disease in a prospective cohort of patients with juvenile idiopathic arthritis? The importance of definition
