Editorial
1325 Tracking JAKs in spondyloarthritis: rationale and expectations
C Miceli-Richard, M Dougados

Recommendation
1327 Update of EULAR recommendations for the treatment of systemic sclerosis

Clinical and epidemiological research
1340 Tofacitinib in patients with ankylosing spondylitis: a phase II, 16-week, randomised, placebo-controlled, dose-ranging study
D von der Heijde, A Dezellier, J C Wei, E Drescher, D Fleischaker, T Hendrikx, D Li, S Menon, K S Kazik

1348 Clinical benefit of 1-year certolizumab pegol (CZP) add-on therapy to methotrexate treatment in patients with early rheumatoid arthritis was observed following CZP discontinuation: 2-year results of the C-OPERA study, a phase III randomised trial

1374 Development and validation of a patient-reported outcome instrument for skin involvement in patients with systemic sclerosis
A Man, J K Correa, J Ziemek, R W Simms, D T Felson, R Ljøsstad

1381 How common is clinically inactive disease in a prospective cohort of patients with juvenile idiopathic arthritis? The importance of definition

1382 Anti-TNF-induced remission in very early peripheral spondyloarthritis: the CRESPA study
P Carron, G Várkás, H Cypers, L Van Praet, D Eewaut, V Van den Bosch, on behalf of the CRESPA investigator group

1396 Incident myocardial infarction associated with major types of arthritis in the general population: a systematic review and meta-analysis
O Schier, C Tocsics, R H Glazier, S Hogg-Johnson, E M Badley

Increased risk of rheumatoid arthritis among mothers with children who carry DBR1 risk-associated alleles
G I Cruz, X Shao, H Quach, K A Ho, K Sterba, J A Noble, N A Patteyworl, M P Busch, D J Trulz, W S W Wong, B D Solomon, J E Niederhuber, LA Criswell, L F Barcellos

Dietary intake of fibre and risk of knee osteoarthritis in two US prospective cohorts
Z Dai, J Niu, Y Zhang, P Jacques, D T Felson

Prevalence of remission and its effect on damage and quality of life in Chinese patients with systemic lupus erythematosus
C C Mok, L Y Ho, S M Tse, K Li Chan

A nationwide non-medical switch from originator infliximab to biosimilar CT-P13 in 802 patients with inflammatory arthritis: 1-year clinical outcomes from the DANBIO registry

Long-term outcome is better when a methotrexate-based treatment strategy is combined with 10 mg prednisone daily: follow-up after the second Computer-Assisted Management in Early Rheumatoid Arthritis trial
M Safy, J W G Jacobs, N D IJff, J W J Bijlsma, J M van Laar, M J H de Hair, On behalf of the Society for Rheumatology Research Utrecht (SRU)

A randomised double-blind, placebo-controlled trial of allogeneic umbilical cord-derived mesenchymal stem cell for lupus nephritis
D Deng, P Zhang, Y Guo, T O Lim

Semaphorin 4D inhibits neutrophil activation and is involved in the pathogenesis of neutrophil-mediated autoimmune vasculitis

Breach of autoreactive B cell tolerance by posttranslationally modified proteins

Multimode disease signatures converge to cytotoxic CD8 T cells in primary Sjögren’s syndrome

JAK1-dependent transphosphorylation of JAK2 limits the anti-fibrotic effects of selective JAK2 inhibitors on long-term treatment
Y Zhang, R Lian, C W Chen, T Mallano, C Dees, A Distler, A Reich, C Bergmann, A Ramming, K Gehe, D Mietenz, O Distler, G Schen, J H W Distler

High maternal expression of SIGLEC1 on monocytes as a surrogate marker of a type I interferon signature is a risk factor for the development of autoimmune congenital heart block
A R Lisy, F Szélnéki, K Reiter, G R Burmester, T Rose, T Dörner

Testing for antineutrophil cytoplasmic antibodies (ANCAs) in patients with systemic vasculitides and other diseases
P Novikov, I Smirtenko, N Bulanov, A Zykova, S Moiseev

Antineutrophil cytoplasmic antibodies: appropriate use and interpretation
J Damoiseaux, E Csernok, N Rasmussen, J W Cohen Tervaert, X Bossuyt

Autoinflammatory Disease Damage Index (ADDI): a possible newborn also in hidradenitis suppurativa daily practice
G Damiani, V della Valle, M Iannone, V Dini, A V Marzano

Response to: ‘Autoinflammatory disease damage index (ADDI): a possible newborn also in hidradenitis suppurativa daily practice’ by Damiani et al
K V Annink, N M ter Haar, J Frenkel

Renal biopsies should be performed whenever treatment strategies depend on renal involvement
G Divard, A Sannier, G Hanoune, E Datugas, F Vroonwa, J M Chemouny

Renal biopsies should be performed whenever treatment strategies depend on renal involvement’ by Chemouny et al
M Yates, R J Ayne, C Mukhtar

Erratum: Eular/ERA-EDTA recommendations for the management of ANCA-associated vasculitis
K V Annink, N M ter Haar, J Frenkel

Correspondence

Basic and translational research

Semaphorin 4D inhibits neutrophil activation and is involved in the pathogenesis of neutrophil-mediated autoimmune vasculitis

Breach of autoreactive B cell tolerance by posttranslationally modified proteins

Correction

Eular/ERA-EDTA recommendations for the management of ANCA-associated vasculitis
