Corrections

A Lawrence, F Hol, A Aggarwal, *et al.* Hyperimmunoglobulinaemia D syndrome in India: report of two siblings with a novel mutation. *Ann Rheum Dis* 2006;65:1674–6. In figure 1(B) the component labelled 'Intron 2' should actually be labelled 'Intron 3.' In addition, figure 1 (B) legend should read: (B) Shows the electropherogram with sequence identification of the deletion of a T nucleotide in intron 3. This mutation, IVS3+2 delT, is predicted to affect correct splicing of the exon, resulting in a shift of the reading frame.
