

Correction: 2016 American college of rheumatology/European league against rheumatism criteria for minimal moderate, and major clinical response in juvenile dermatomyositis

Rider LG, Aggarwal R, Pistorio A, *et al.* 2016 American college of rheumatology/European league against rheumatism criteria for minimal moderate, and major clinical response in juvenile dermatomyositis. *Ann of Rheum Dis* 2017;76:782–91. doi:10.1136/annrheumdis-2017-211401.

The footnote for table 3 has been corrected to:

The enzyme range was calculated based on a 90% range of enzymes from natural history data (5,38), which for creatine kinase is 20 times the upper limit of normal (ULN), for aldolase is 6 times the ULN, and for lactate dehydrogenase, aspartate aminotransferase, and alanine transaminase is 5 times the ULN.
