## TRIPOD Checklist: Prediction Model Development and Validation

Section/Topic	Item		Checklist Item	Page
Title and abstract	1	D:V	Identify the study as developing and/or validating a multivariable prediction model, the	1
Abstract	2	D;V	target population, and the outcome to be predicted. Provide a summary of objectives, study design, setting, participants, sample size,	
	2	D,v	predictors, outcome, statistical analysis, results, and conclusions.	2
Introduction	[ ]		Explain the medical context (including whether diagnostic or prognostic) and rationale	[
Background and objectives	3a	D;V	for developing or validating the multivariable prediction model, including references to existing models.	3
	3b	D;V	Specify the objectives, including whether the study describes the development or validation of the model or both.	4
Methods				1
Source of data	4a	D;V	Describe the study design or source of data (e.g., randomized trial, cohort, or registry data), separately for the development and validation data sets, if applicable.	4
	4b	D;V	Specify the key study dates, including start of accrual; end of accrual; and, if applicable, end of follow-up.	4
Participants	5a	D;V	Specify key elements of the study setting (e.g., primary care, secondary care, general population) including number and location of centres.	4 & online supplementary file 1
	5b	D;V	Describe eligibility criteria for participants.	4 & online supplementary file 1
	5c	D;V	Give details of treatments received, if relevant.	n/a
Outcome	6a	D;V	Clearly define the outcome that is predicted by the prediction model, including how and when assessed.	4
	6b	D;V	Report any actions to blind assessment of the outcome to be predicted. Clearly define all predictors used in developing or validating the multivariable prediction	4
Predictors	7a	D;V	model, including how and when they were measured.	4
	7b	D;V	Report any actions to blind assessment of predictors for the outcome and other predictors.	4 & online supplementary file 1
Sample size	8	D;V	Explain how the study size was arrived at. Describe how missing data were handled (e.g., complete-case analysis, single	5 5 & online
Missing data	9	D;V	imputation, multiple imputation) with details of any imputation method.	supplementary file 1
Statistical analysis methods	10a	D	Describe how predictors were handled in the analyses.	4
	10b	D	Specify type of model, all model-building procedures (including any predictor selection), and method for internal validation.	5-65 & online supplementary file 1
	10c	V	For validation, describe how the predictions were calculated.	5
	10d	D;V	Specify all measures used to assess model performance and, if relevant, to compare multiple models.	5 & online supplementary file 1
	10e	V	Describe any model updating (e.g., recalibration) arising from the validation, if done.	5 & online supplementary file 1
Risk groups	11	D;V	Provide details on how risk groups were created, if done.	n/a
Development	12	V	For validation, identify any differences from the development data in setting, eligibility	5 & online
vs. validation Results		-	criteria, outcome, and predictors.	supplementary file 1
Participants	13a	D;V	Describe the flow of participants through the study, including the number of participants with and without the outcome and, if applicable, a summary of the follow-up time. A diagram may be helpful.	online supplementary file 1
	13b	D;V	Describe the characteristics of the participants (basic demographics, clinical features, available predictors), including the number of participants with missing data for predictors and outcome.	6;17-19
	13c	V	For validation, show a comparison with the development data of the distribution of important variables (demographics, predictors and outcome).	6;17-19
Marchal	14a	D	Specify the number of participants and outcome events in each analysis.	7;18;19
Model development	14b	D	If done, report the unadjusted association between each candidate predictor and	online supplementary
Model specification	140 15a	D	outcome. Present the full prediction model to allow predictions for individuals (i.e., all regression	file 1 6-7;19-22
	15a	D	coefficients, and model intercept or baseline survival at a given time point). Explain how to the use the prediction model.	8 & online supplementary file 1
Model performance	16	D;V	Report performance measures (with CIs) for the prediction model.	7; Figure 1-4
Model-updating	17	V	If done, report the results from any model updating (i.e., model specification, model performance).	7 & online supplementary file 1
Discussion			pononnunoo <sub>/</sub> .	
Limitations	18	D;V	Discuss any limitations of the study (such as nonrepresentative sample, few events per predictor, missing data).	8-9
Interpretation	19a	V	For validation, discuss the results with reference to performance in the development data, and any other validation data.	9-10
	19b	D;V	Give an overall interpretation of the results, considering objectives, limitations, results	10-11
Implications	20	D;V	from similar studies, and other relevant evidence. Discuss the potential clinical use of the model and implications for future research.	10-11
Other information		.,.		
Supplementary information	21	D;V	Provide information about the availability of supplementary resources, such as study protocol, Web calculator, and data sets.	online supplementary file
Funding	22	D;V	Give the source of funding and the role of the funders for the present study.	12

\*Items relevant only to the development of a prediction model are denoted by D, items relating solely to a validation of a prediction model are denoted by V, and items relating to both are denoted D;V. We recommend using the TRIPOD Checklist in conjunction with the TRIPOD Explanation and Elaboration document.
