

Table 2

Interaction tests addressing the hypothesis that specific sub-groups of RMD-patients might be more willing to receive vaccination for COVID-19.

Interactions *models adjusted for age and sex	Willingness for COVID-19 vaccination RMD-patients (n = 626)	
	OR (95%CI)	p value
RMD-patients and cancer		
RMD-patients *cancer	8.13 (0 – inf)	0.978
Healthy controls	ref	-
RMD-patients and hypertension		
RMD-patients *hypertension	0.96 (0.33 – 2.78)	0.940
Healthy controls	ref	-
RMD-patients and diabetes		
RMD-patients *diabetes	0.43 (0.04 – 4.35)	0.475
Healthy controls	ref	-
RMD-patients and respiratory		
RMD-patients *respiratory	0.52 (0.05 – 5.05)	0.580
Healthy controls	ref	-

RMD: Rheumatic and Musculoskeletal Disease

OR: Odds Ratio

CI: Confidence Interval
