Correction: The effect of achieving serological remission on subsequent risk of relapse, end-stage renal disease and mortality in ANCA-associated vasculitis: a target trial emulation study

The authors neglected to include a disclaimer statement related to the use of data from the United States Renal Data System; this has now been included in a corrected manuscript. Additionally, a statement has been included with each table explaining that the data included in these tables were not collected from the USRDS data. These data were ascertained using data curated within the Mass General Brigham Healthcare System. This correction has not been made in print.
