

Response to: 'Correspondence on 'EULAR December 2020 View points on SARS-CoV-2 vaccination in patients with RMDs' by Bugatti *et al*

It is great to learn that these Italian colleagues take an active and effective role in promoting vaccination in their patients. The more and earlier our patients, and also the entire population, are vaccinated, the better outcomes in health and quality of life. I am quite sure this example is followed by rheumatologists and other healthcare providers in many countries.
