

### **On-line Table**

Correlation of Changes in Jenkins Scale and FOSQ Total Scores with Changes in Other Clinical Outcomes (Pearson's Correlation Coefficient)

	Jenkins Scale Total Score	FOSQ Total Score <sup>1</sup>
Pain VAS	0.376*	-0.386*
FIQ Total Score	0.518*	-0.564*
PGIC	0.467*	-0.428*
Fatigue VAS	0.457*	-0.438*

<sup>1</sup>Correlation coefficients are negative because a lower FOSQ score indicates greater impact of being "tired" or "sleepy"
