

Supplementary Table S2. Expert opinion on use of antirheumatic drugs during pregnancy and breastfeeding

As an expert in the field	
●	I would recommend the drug in the same way as if the patient was not pregnant
●	I would only recommend the drug if I feared at least moderate disease activity in its absence
●	I would only recommend the drug if I feared at least severe disease activity in its absence
●	I would never recommend the drug in pregnancy
As an expert in the field	
●	I would recommend the drug in the same way as if the patient did not breastfeed
●	I would only recommend the drug if I feared at least moderate disease activity in its absence
●	I would only recommend the drug if I feared at least severe disease activity in its absence
●	I would never recommend the drug while a woman was breastfeeding
